Report Comments

This report is unique to a teacher (instructor or TA) and class. If the class sections have been merged together, there may be multiple sections represented in this data.

The response statistics at the top of this report show both course and teacher response counts.

The course and teacher response rates can be different, particularly if the course has multiple instructors/TAs. Sometimes students respond to the course questions but not the instructor/TA questions, or students skip the questions for this particular instructor/TA.

3. What was the attendance policy regarding sections for this course:

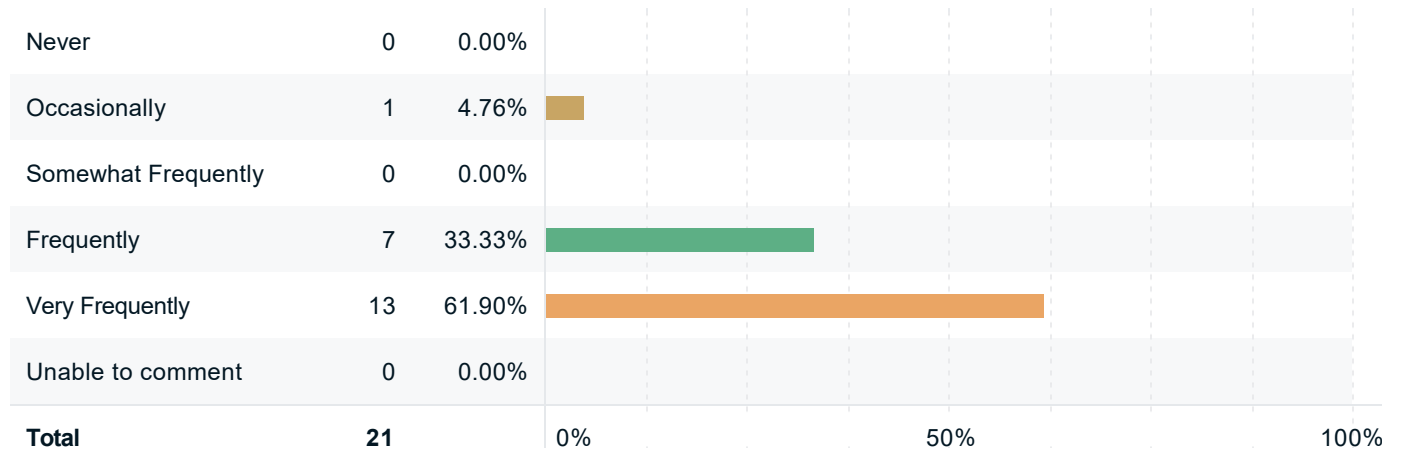

4. How many times did you attend section or lab with the TA this quarter (10-week term)?

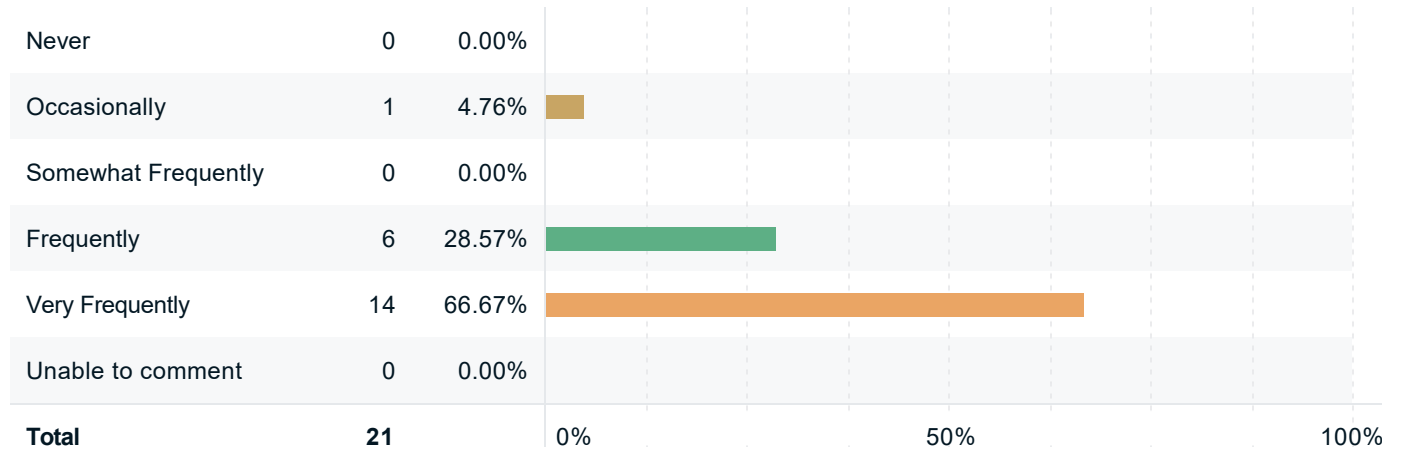

5. How many times did you meet with this TA in office hours or by appointment?

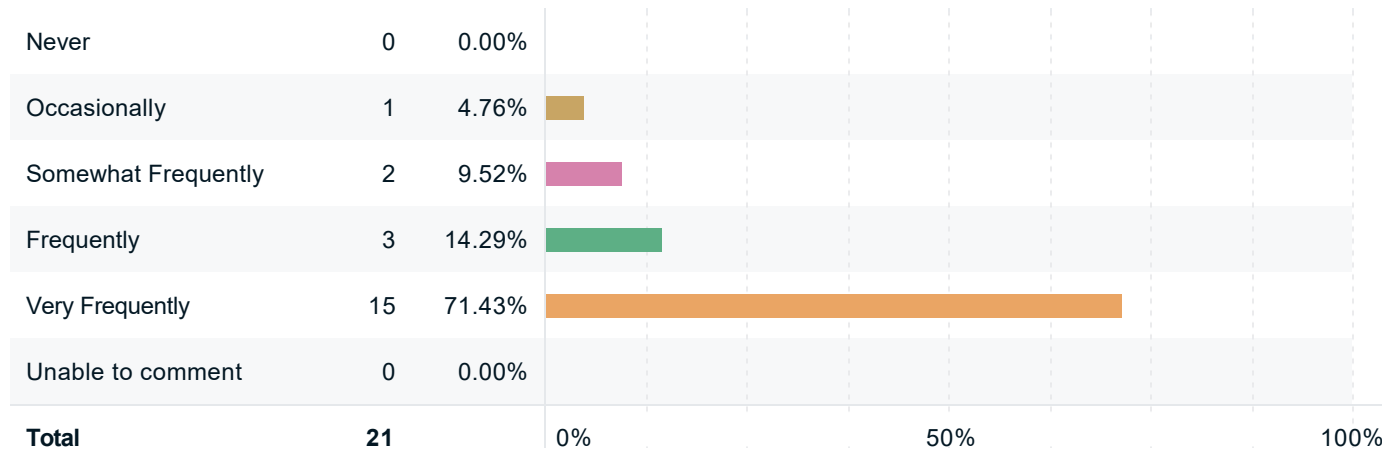

6. The TA explained concepts in ways that supported my learning.

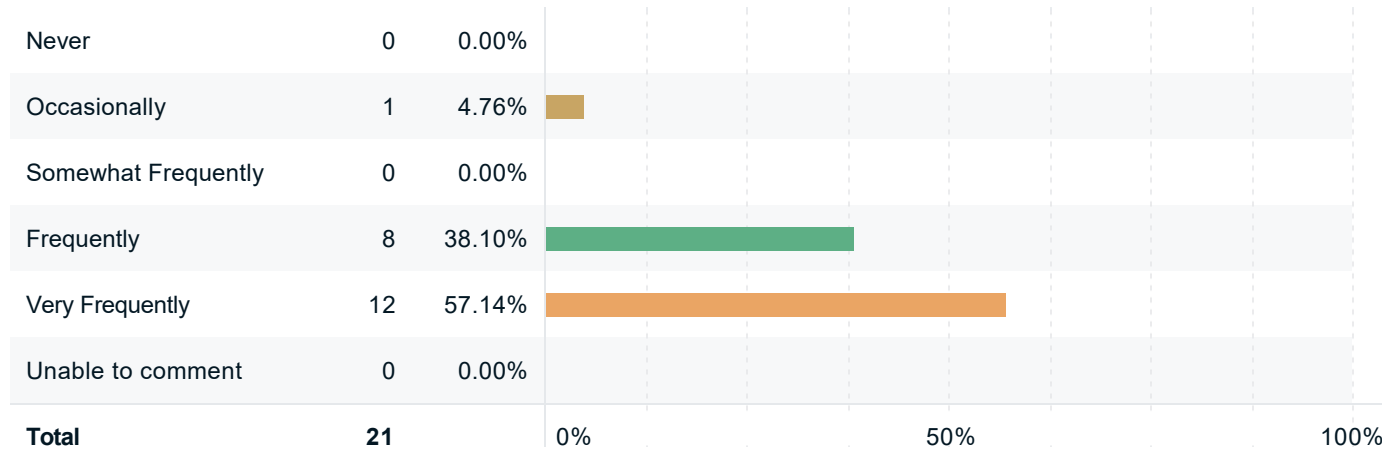

7. The TA organized sections/lab meetings well.

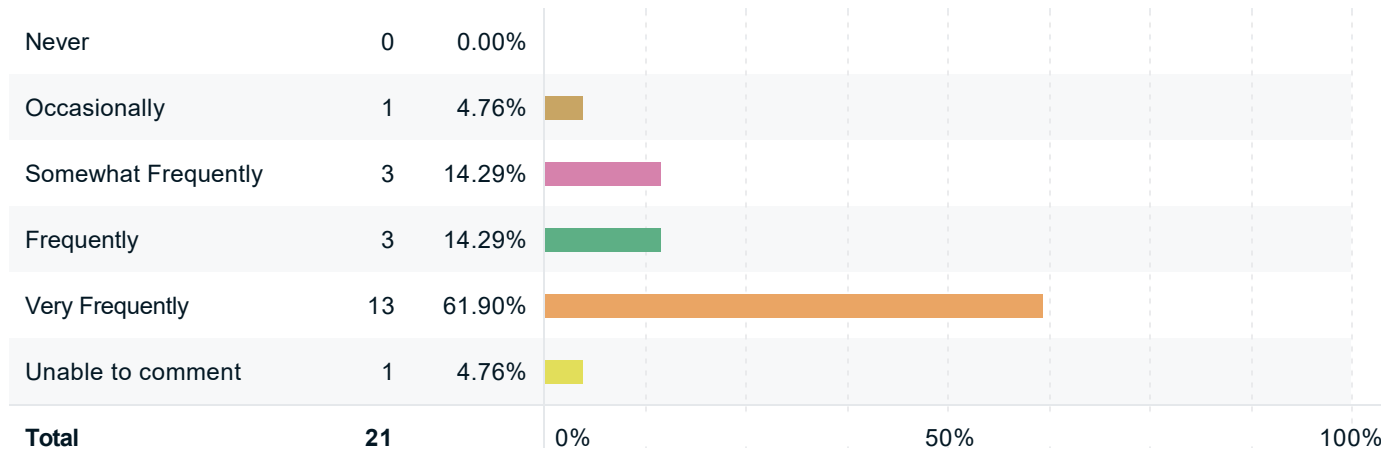

8. Section meetings/labs included opportunities for students to contribute and interact.

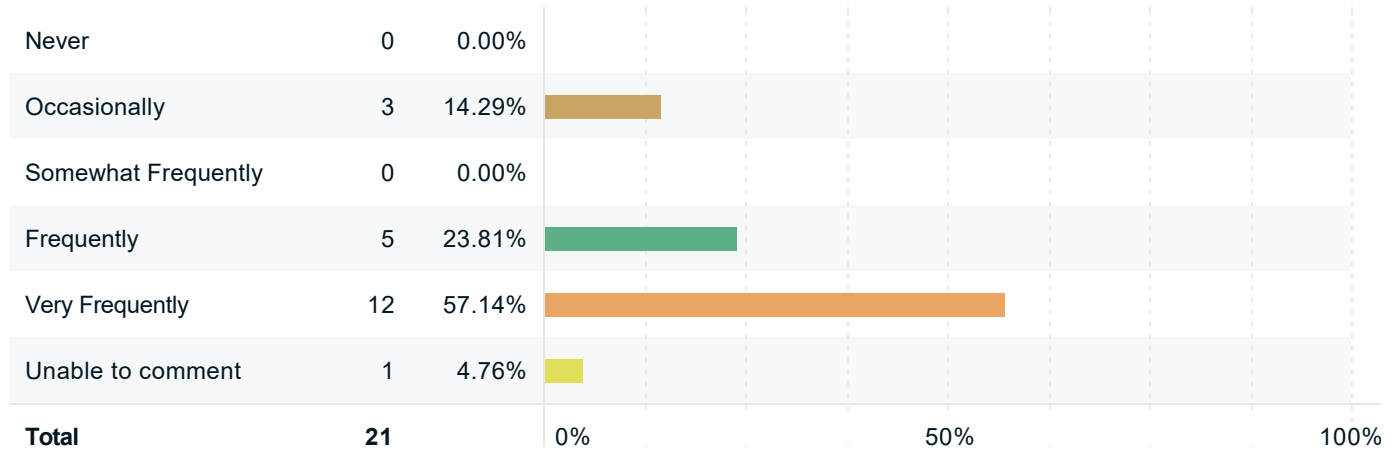

9. The TA provided sufficient support and encouragement for my participation in sections/labs.

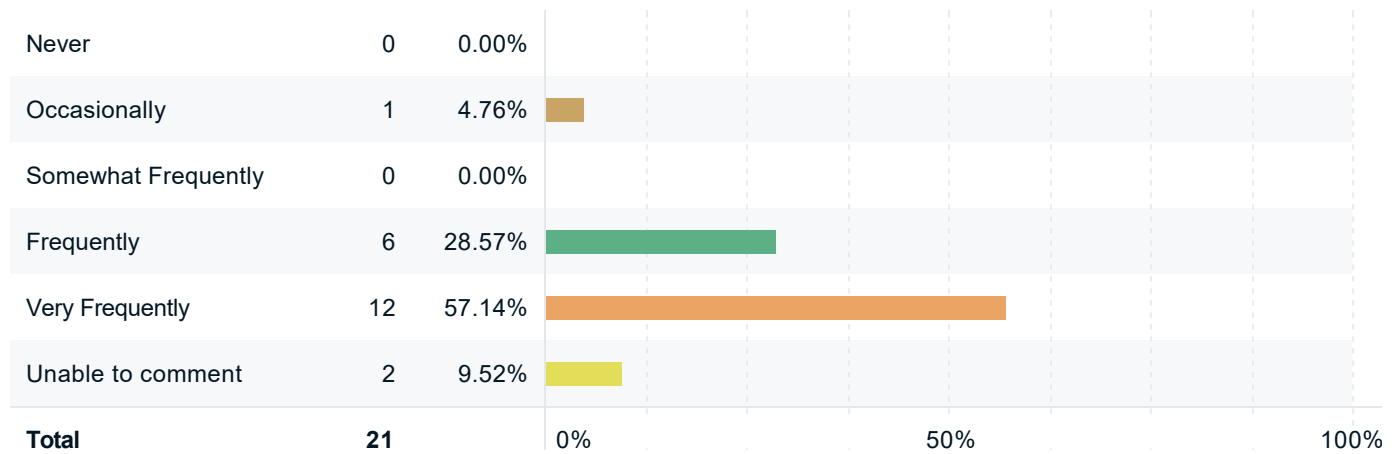

10. When needed, the TA was able to help me prepare for assignments (papers, quizzes, exams).

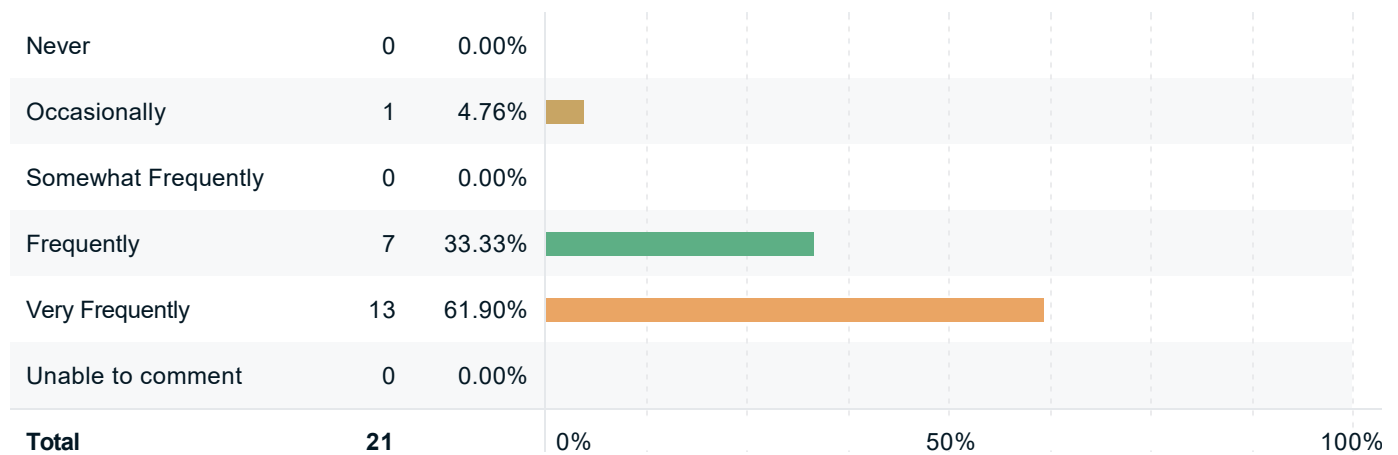

11. The TA provided useful feedback on my assignments if part of the TA duties.

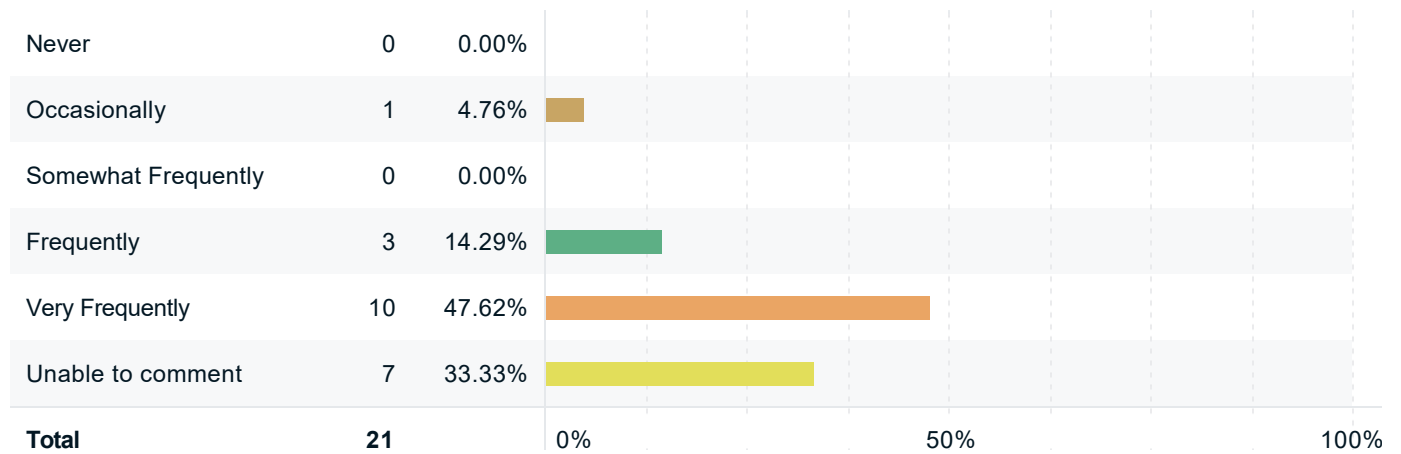

12. The TA was able to answer my questions and clear up misunderstandings about the course material and concepts.

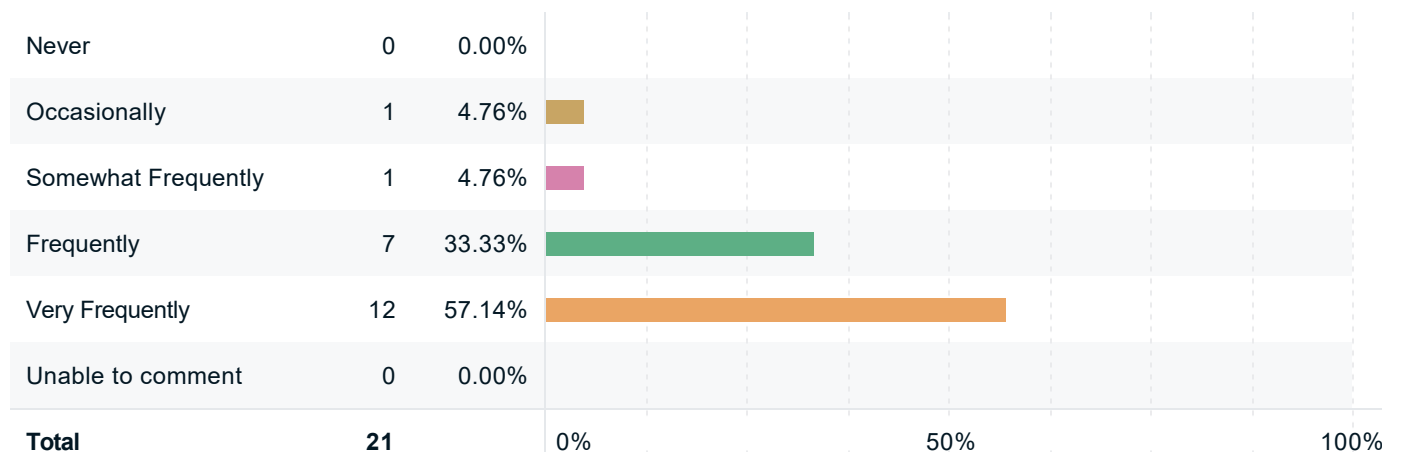

13. The TA made me feel as though I could succeed in this class.

14. The TA was available in scheduled office hours or by appointment outside of class time (whether or not I attended office hours.)

15. Activities during sections were well structured and had clear goals.

16. Please describe any specific teaching practices that your TA used that particularly helped you to learn the material and/or develop your own critical perspectives on the material.

Comments
Help with everything, like going over similar questions.
he is basically taught a small lecture in the discussion
going over problem set and worksheets in the section
–
Gagandeep was one of the best teachers I have ever had. He is very passionate about what he does and cares about each and every student. He put in so much effort to create practice problems structured like our midterm questions. I do not think I would have done as well in this course without him.
He really tried to help us understand the basics and the mechanics going on behind the math concepts we needed to learn. Understanding the foundations helped concepts click.
I think the visualizations were always very helpful, as he would draw out graphs, but he would also have very rapid-fire prompts that would cause you to think in your head before looking at your graph.
He would go over problems but not just that explain the topic from the base systems
Went over problems.
I liked the practice problems that were given, they were very similar if then, the same as the ones on our homework/problem sets.
He would go over some of the problem set problems so I could check and compare my work and actively had us try and work out the problems for ourselves
Interaction with the students and asking questions to us.
He reinforced my learning through going through a bunch of test cases for how graphs would change for specific problems. That was pretty valuable because I could better connect problem to graphs.
Calling on students to answer questions, in depth explanations of concepts and problems

17. Please describe any specific teaching practices that your TA used that helped you engage with the course material or that encouraged you to feel that you could succeed in the course.

Comments
Everything he was the best!
he wrote many note on the black board
going over problem set and worksheets in the section and helping me individually during office hours
–
He created extra practice problems structured like the ones on the midterms, conceptual problems which applied our material to real world problems, and made sure everyone felt welcome in his sections.
He encouraged class participation, used the whiteboard to draw out graphs, and created his own practice problems that we could use.
An amazing TA truly always trying help people understand concepts deeper; while still managing to keep the topic general, he would do this by simply giving a better explanation to things and just helping explain over and over again.
just made sure the students were all engaged and understanding and set up goals to understand
Went over problems.
Using the same material as in class
The TA made us try to answer to questions before giving us an explanation to make us try to think with our own minds first, and only afterwards we would be told the answer. I think this is really good.
He's pretty chill, and he has a pretty easygoing attitude which was reassuring. Also he was down to explain concept even after class which really helped.
Addressing my questions personally and directly

18. Please describe any specific teaching practices that were less helpful for your learning, or offer constructive suggestions that might improve your TA's effectiveness.

Comments
Nothing
i don't know
n/a
–
Structure for the earlier TA sections could be a little more helpful if they didn't focus so much on doing similar problems during all of the sections. Or at least limiting it to one class, and allowing those who have questions to clarify them after class/over office hours.
None
n/a
The TA made us try to answer to questions before giving us an explanation to make us try to think with our own minds first, and only afterwards we would be told the answer. I think this is really good.
Not totally sure if this helps, but sometimes he'd ask questions that are open ended, but we won't exactly answer to his liking, then eventually he does have to say it himself. We have like a 25% chance of guessing it. However ti could be a good teaching strategy because it gets us to think, and could make the concept more apparent in my mind. However off the top of my head I'm not able to recollect an exact example, but I remember the structure of it. Maybe something to lean into or improve possibly.
Also I like how the TA's attitude toward the final, and he gave us practice problem, but when I was doing the test I was jumpscared by conceptual part, in which there wasn't a work bank to answer, because we were only focusing on the mathematical portion
.

16. Please describe any specific teaching practices that your TA used that particularly helped you to learn the material and/or develop your own critical perspectives on the material.

Comments
Helping with homework
Gagandeep went over certain concepts that we needed to help complete the assignments. Additionally he went through STATA code with us so that we can learn how to use the code to complete the assignment and understand how the code ties to the concepts we learned in class.
Thanks for the help of all assignments
Honestly, based
Gagandeep was extremely helpful in guiding us through the homework material and the general course. His mannerisms, presentation of information, and how he explained it were top-notch. He was extremely helpful during office hours and went out of his way to help. His section material supplemented the class very well.
N/A
Going over difficult hw questions in sections.
Gagandeep's sections revolved around participation, in which was extremally helpful in understanding the material.
Thoroughly explaining every concept
Gagandeep had a very targeted approach to helping us refine our understanding of the material. Primarily by making sure we understood what was expected through assignments.
nice guy. He seemed like he cared about us learning and the section wasn't just a job.
Showing examples of problems and working through hw problems.
Collaborative group code and explaining intuition behind hw problems was very useful.

17. Please describe any specific teaching practices that your TA used that helped you engage with the course material or that encouraged you to feel that you could succeed in the course.

Comments
Providing code and explaining it
Gagandeep had a great approach to each section and I think the way it was structured was greatly beneficial to the class and every moment mattered. Calling on us randomly for some questions was also good so that we wouldn't be caught lacking.
Solid overall, funny and engaging. Good sense of humor, made earnest conversation with all students.
Just like Prof. Bulman, his ability to crack jokes and keep the discussions light was extremely helpful in us being engaged in the material.
N/A
Making sections interactive by frequently calling on students to answer questions. It made me feel more engaged in the course.
Sections were well structured
Called on students frequently and maintained a relaxed, yet professional environment
Gagandeep is super friendly and approachable. Felt like I could ask a question whenever. And whenever I did, he was helpful.
Just slowing down when we weren't understanding and matching people where they were at.
He has good energy for teaching and made class enjoyable.
I enjoyed how he encouraged us to participate in section, whether it was writing on the board or writing code on a collaborative Google Doc.

18. Please describe any specific teaching practices that were less helpful for your learning, or offer constructive suggestions that might improve your TA's effectiveness.

Comments
None
I honestly believe it was all useful.
No comment
NA. Gagandeep is one of the best TAs I have had in my life, and I am very appreciative of the help he gave to all of us.

Comments

Nothing crazy tbh

During his sections he would have us participate in solving the questions and would guide us through a definition or equations when we didn't understand what it meant. And he would solve each question out step by step while writing down when the equation/process would be used.

example questions

He would check in with us during the session to make sure we were understanding the material. I liked how he went step by step and broke down concepts in a way that was clear.

Goes through the basics and then tackles the question at hand.

Gagandeep helped made the class feel engaging and fun for all the students in his section/discussion when the professor did not. His discussion sections was geared towards solving the homework and often times I feel like I learned more during those 2 hours than than actual class.

Group discussions and breaking down the problem in ways that were easy to follow.

17. Please describe any specific teaching practices that your TA used that helped you engage with the course material or that encouraged you to feel that you could succeed in the course.

Comments
Nothing crazy tbh
It was really helpful when he would call on us to explain the next step or define something because it helped me actively recall material and helped me feel like I understood the material.
example questions and explanations
Best TA ever!! He is incredible engaging and kind. He is always willing to help even if that means scheduling extra sessions.
Useful examples and solving problems in section.
Makes class engaging by encouraging questions. Calls on students and if they don't know the answer, he'll work it out with us. Cracks jokes to get the students to laugh, good atmosphere.
Going into more detail/being clear about the content.

18. Please describe any specific teaching practices that were less helpful for your learning, or offer constructive suggestions that might improve your TA's effectiveness.

Comments

Comments

Gagandeep Sachdeva made me feel prepared by creating a cheat sheet before beginning questions so we can refer to them to see how they apply to problems this made it easy to note how formulas connect to each other, where they go why, and when to use them.

Going over problems as well as summarizing concepts

We worked on our problem sets and have each student solve the problem together.

NA

Gagandeep is extremely good at teaching intermediate microeconomics. His sections are well structured and he cultivates a welcoming environment that encourages student participation. He seems invested in his students and to genuinely care about their success. His teaching methods helped boost my confidence and helped me succeed in this class. He was able to break down concepts in ways to where I actually understood course material instead of just going through the motions of solving problems using set equations.

covering materials on the problem sets and study guides, while teaching the basic knowledge on how to solve these problems.

17. Please describe any specific teaching practices that your TA used that helped you engage with the course material or that encouraged you to feel that you could succeed in the course.

Comments
Gagandeep Sachdeva also made us pass around a talking stick to answer what step/ method of the question we do. This made me stay on my toes and be engaged with the material even if we would say the wrong thing Gagandeep would help guide us and learn our mistakes in a way that didn't make us scared to make mistakes.
Going over problems as well as summarizing concepts
By having each problem solved, I git prepared for exam with confidence.
NA
Did a great job solving problems using examples unrelated to the specific problem to further student' s understanding of concepts. Encouraged participation and helped students stay engaged and gain confidence.
Going over specific problems and helping during office hours.

18. Please describe any specific teaching practices that were less helpful for your learning, or offer constructive suggestions that might improve your TA's effectiveness.

Comments
.
He was very interactive through each section so that we would feel engaged and was always considerate because our section was quite late in the day.
He would take time to break down the individual processes in order to solve our given problem.
Explained concepts well
Did not gage with TA
NA
The powerpoint presentations were clear and concise. They were straightforward and easy to understand, just by looking at them.
Working in groups/group activity
Group interaction.
held great discussion sections
The format of sections were very well organized – going through a slideshow every week to study concepts, which were outlined at the beginning of the slideshow itself. It helped very much to understand what our learning goals were, and the practice examples themselves were very informative!

17. Please describe any specific teaching practices that your TA used that helped you engage with the course material or that encouraged you to feel that you could succeed in the course.

Comments
.
He made it so that the class would have to answer questions he provided.
He would put us into groups based on our table seating, and then ask a question and one group would volunteer to answer.
I liked the activities
Did not gage with TA
NA
The Zoom midterm review session helped me engage with the course material better and prepared me for the midterm. The study guide was also organized well and was a good summary of all the material we learned in class.
We applied real life scenarios
Engagement.
great inclusion of all students in the discussion sections
Everyone in section was asked at least one question or another pertaining to the slides, which greatly helped with feeling engaged! If we got an answer wrong, Gagandeep was very encouraging and patient til we were able to find the correct solution– this was very much appreciated, it made the environment a lot less daunting. Additionally, the week of Thanksgiving when sections didn't meet, he sent us a recording of the material from the week on his own time, which was very helpful and appreciated as well! It was definitely the most engaging and enjoyable section I've been apart of.

18. Please describe any specific teaching practices that were less helpful for your learning, or offer constructive suggestions that might improve your TA’s effectiveness.

The TA was able to explain ideas clearly and made sure everyone understood what was going on outside of class.
The TA was great at explaining the material! I particularly appreciated how they explained the why behind the material and covered it all very thoroughly.
I only attended the first section of the quarter via Zoom, but Gagandeep did a very good job of reviewing concepts from previous courses that would be necessary to know for this one
He would provide more examples for the concepts. This includes the math and previous concepts learned from other classes.

17. Please describe any specific teaching practices that your TA used that helped you engage with the course material or that encouraged you to feel that you could succeed in the course.

Being active on discord
He did not make me feel welcome in the class.
Gagandeep has been my best TA in my three years at UCSC. He helped me with all homework and reviewing test results
The TA gave many examples to make sure that everyone could get what was being taught.

18. Please describe any specific teaching practices that were less helpful for your learning, or offer constructive suggestions that might improve your TA's effectiveness.

What is your current class standing at UCSC?

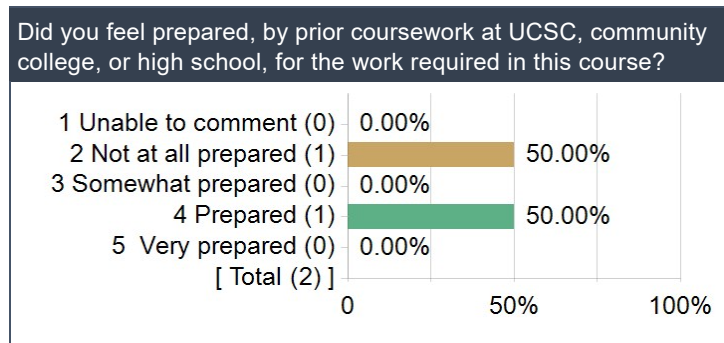

Why are you taking this class?

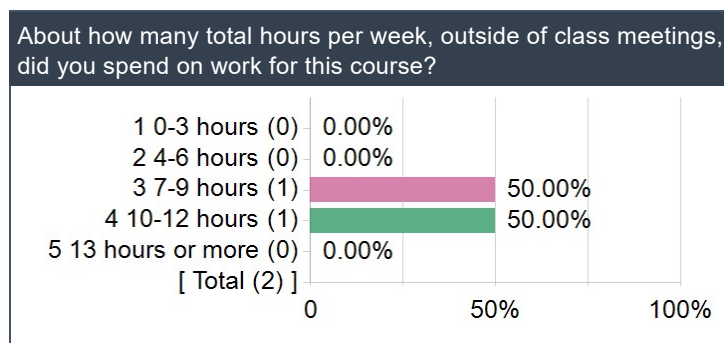

What percentage of class activities or meetings did you participate in? (Note: 1 week = 10%)

Did you feel prepared, by prior coursework at UCSC, community college, or high school, for the work required in this course?

About how many total hours per week, outside of class meetings, did you spend on work for this course?

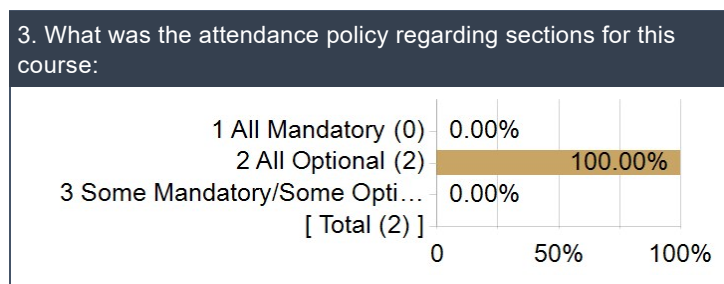

1. What is the name of your Teaching Assistant?

Students
Gagandeep Sachdeva
Gagandeep Sachdeva

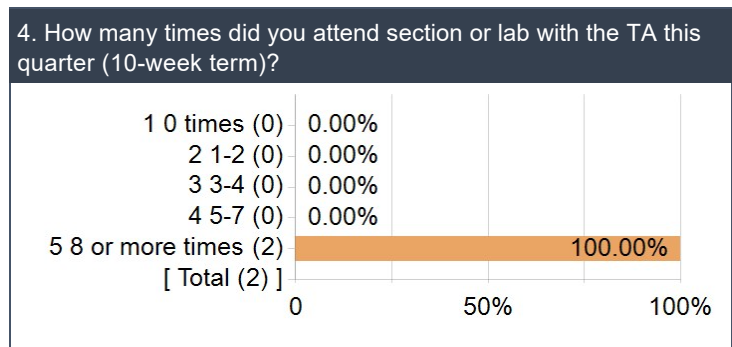

2. What is your intended or declared major? If undecided, please write “undecided.”

Students
MS Applied Economics and Finance
industrial ing, master in development

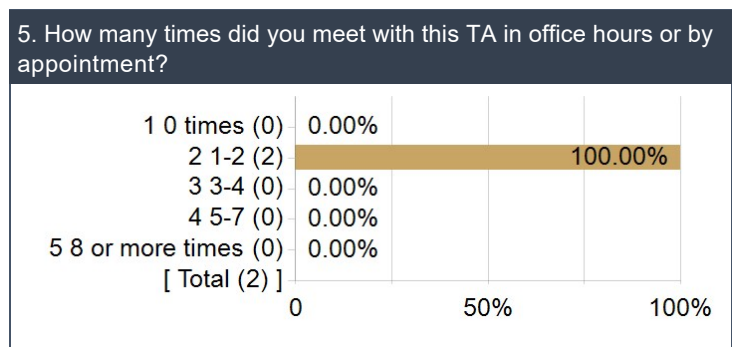

3. What was the attendance policy regarding sections for this course:

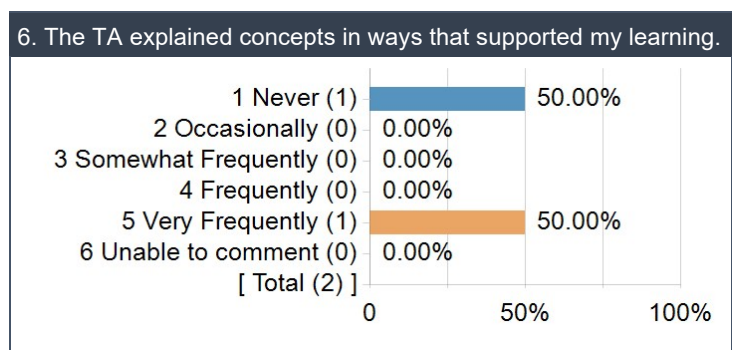

4. How many times did you attend section or lab with the TA this quarter (10-week term)?

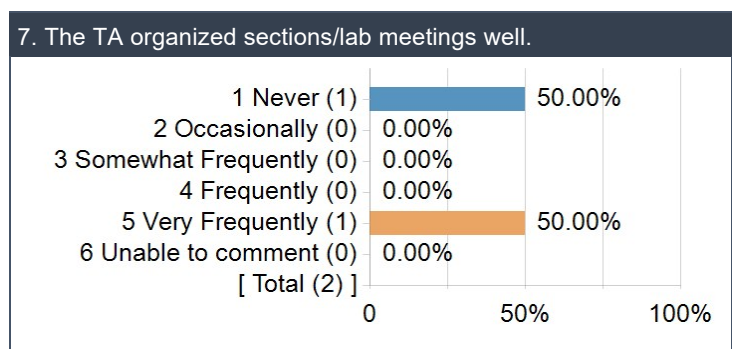

5. How many times did you meet with this TA in office hours or by appointment?

6. The TA explained concepts in ways that supported my learning.

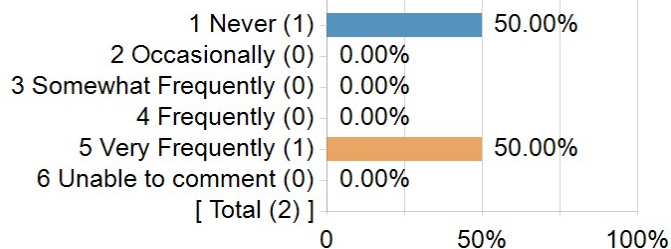

7. The TA organized sections/lab meetings well.

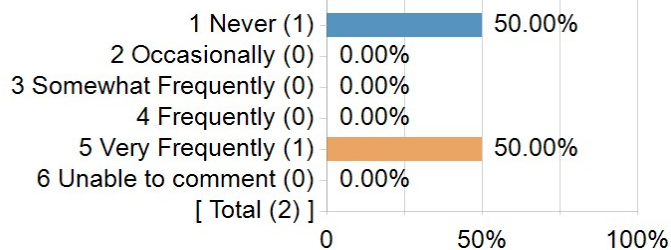

8. Section meetings/labs included opportunities for students to contribute and interact.

8. Section meetings/labs included opportunities for students to contribute and interact.

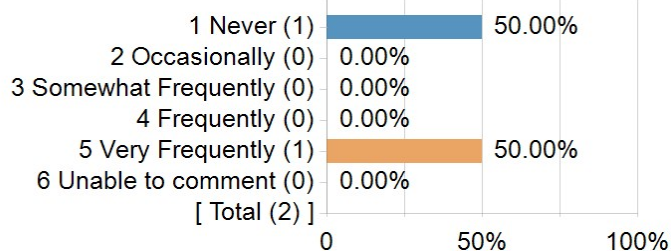

9. The TA provided sufficient support and encouragement for my participation in sections/labs.

9. The TA provided sufficient support and encouragement for my participation in sections/labs.

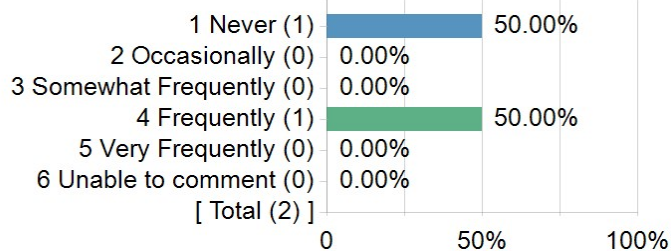

10. When needed, the TA was able to help me prepare for assignments (papers, quizzes, exams).

10. When needed, the TA was able to help me prepare for assignments (papers, quizzes, exams).

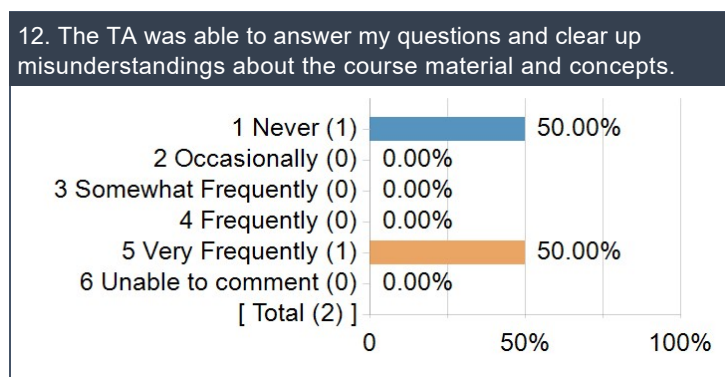

11. The TA provided useful feedback on my assignments if part of the TA duties.

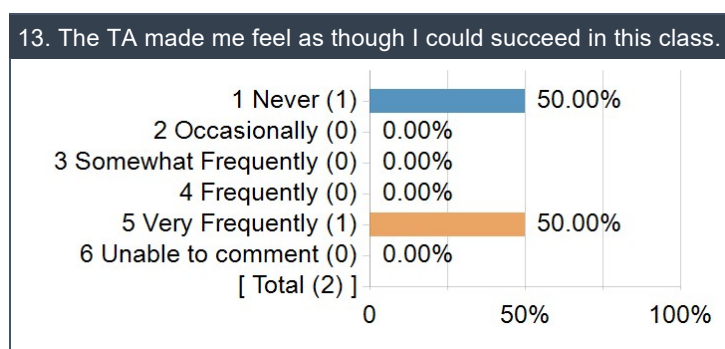

11. The TA provided useful feedback on my assignments if part of the TA duties.

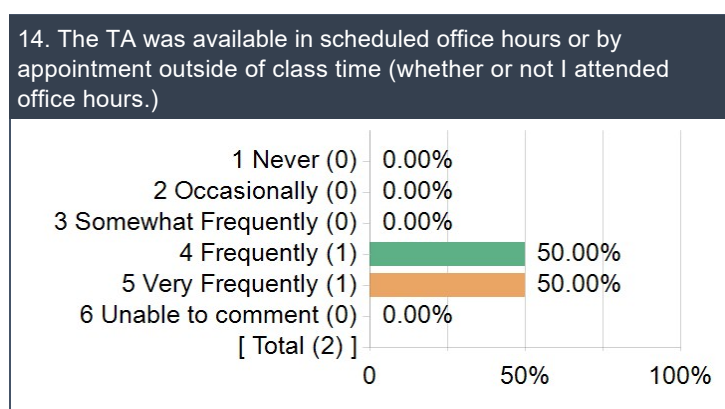

12. The TA was able to answer my questions and clear up misunderstandings about the course material and concepts.

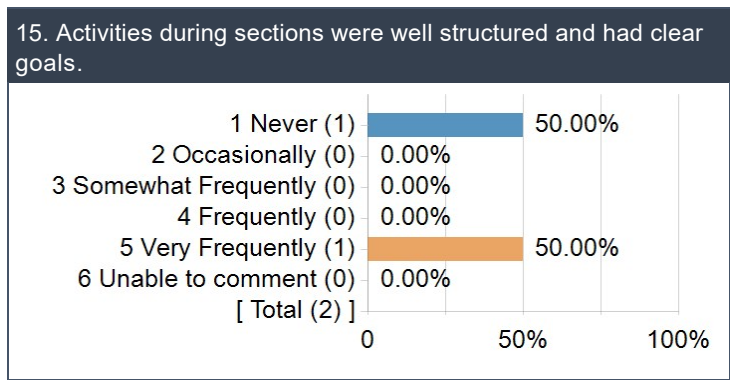

13. The TA made me feel as though I could succeed in this class.

14. The TA was available in scheduled office hours or by appointment outside of class time (whether or not I attended office hours.)

15. Activities during sections were well structured and had clear goals.

16. Please describe any specific teaching practices that your TA used that particularly helped you to learn the material and/or develop your own critical perspectives on the material.

Students

I appreciated how interactive Gagandeep made sections. It was helpful that he encouraged every student interact instead of letting one or two students answer everything. Being somewhat put on the spot, or expected to engage helped me learn and engage with the material.

End of Quarter Feedback- Econ 2021

Please describe any specific teaching practices that your TA used that particularly helped you to learn the material and/or develop your own critical perspectives on the material.

1 response

The TA taught us how to organize a lot of data or information before attempting to solve any problems. Then he showed us how to think about logical ways to find the steps necessary to solve them.

Please describe any specific teaching practices that your TA used that helped you engage with the course material or that encouraged you to feel that you could succeed in the course.

1 response

The fact that he was well empathetic and he was flexible made encouraged me. He provided numerous websites that helped out with code for data homework. He also had us participate in section and solve problems with him in section.

Please describe any specific teaching practices that were less helpful for your learning, or offer constructive suggestions that might improve your TA's effectiveness.

15. Activities during sections were well structured and had clear goals.

16. Please describe any specific teaching practices that your TA used that particularly helped you to learn the material and/or develop your own critical perspectives on the material.

Students

I liked when we went over practice problems and reiterated concepts learned in lecture. I also liked the "cookbooks" that broke down all the important information for each topic.

17. Please describe any specific teaching practices that your TA used that helped you engage with the course material or that encouraged you to feel that you could succeed in the course.

Students

Since there were usually two or three people in section (including me), the sections felt very 1-on-1. He stops frequently during problems to check-in that everyone is understanding.

18. Please describe any specific teaching practices that were less helpful for your learning, or offer constructive suggestions that might improve your TA's effectiveness.

Students

Sections always had a plan but they usually went much longer into office hours. Sometimes we'd go over problems/concepts that were out of the scope of the class which could confuse me at times.

Comments
I think post midterm reviews seemed to be helpful in clearing up any problems that were present after the exams.
The sections, that were optional, helped me understand concepts better and they answered my questions
Asking student's what they wanted to go over helped focus on students needs.
none
None
NA
Discussions were helpful.
The TA was open to answering questions and went over specific topics when asked about them.
Gagandeep answered questions well; made it simple and less complicated

Please describe any specific teaching practices that your TA used that helped you engage with the course material or that encouraged you to feel that you could succeed in the course.

Comments
I think the idea that there were 3 different ways to learn the same topic was interesting as it allowed for several different viewpoints on the topic being discussed.
The sections provided useful
Step by step example problems through dropbox
he went over the lecture notes
None
NA
Slides
The TA essentially reviewed the material that was covered in the week's lecture videos.

Please describe any specific teaching practices that were less helpful for your learning, or offer constructive suggestions that might improve your TA's effectiveness.

Comments
I think the idea that there was a change in the section policy most likely hampered my motivation and need to attend the sections
I felt sometimes there was a tone that made it very intimidating to speak up in class, and scared to not say the most perfect answer in class.
none
None
NA
Try to include something else other than lecturing, like have additional problem sets but make them optional.
